GuruDesk

Trust in GuruDesk for unparalleled Guru support and exceptional products - a reliable choice for all your online business needs.

Established in 2012 in Estonia, GuruDesk.com has a long history of providing top-quality hosting and cloud infrastructure services, email hosting, and more. With over 1,000 successful projects completed, and servers located in both Europe and the US, hosting over 5,000 customer websites, we have the resources and expertise to support your digital needs. We offer a comprehensive web application with access to our premium support service and other valuable resources. We can discuss your project requirements and explore how we can partner with you as your digital partner, solving any problems and providing efficient solutions for your company. You can view some of our latest web development projects in the following slides, all powered by our high-performance WordPress stack.

integralyatirim.gurudesk.dev

İNTEGRAL YATIRIM

Integral Yatırım is a well-respected finance company in Türkiye that played a key role in regulating Forex in the country. GuruDesk helped Integral Yatırım bring together their three separate websites into a single, easy-to-use platform.

The new website boasts a strong user interface and user experience, and its smooth navigation enhances the overall user experience. Additionally, the design and code were custom-made to meet Integral Yatırım's specific needs and requirements.

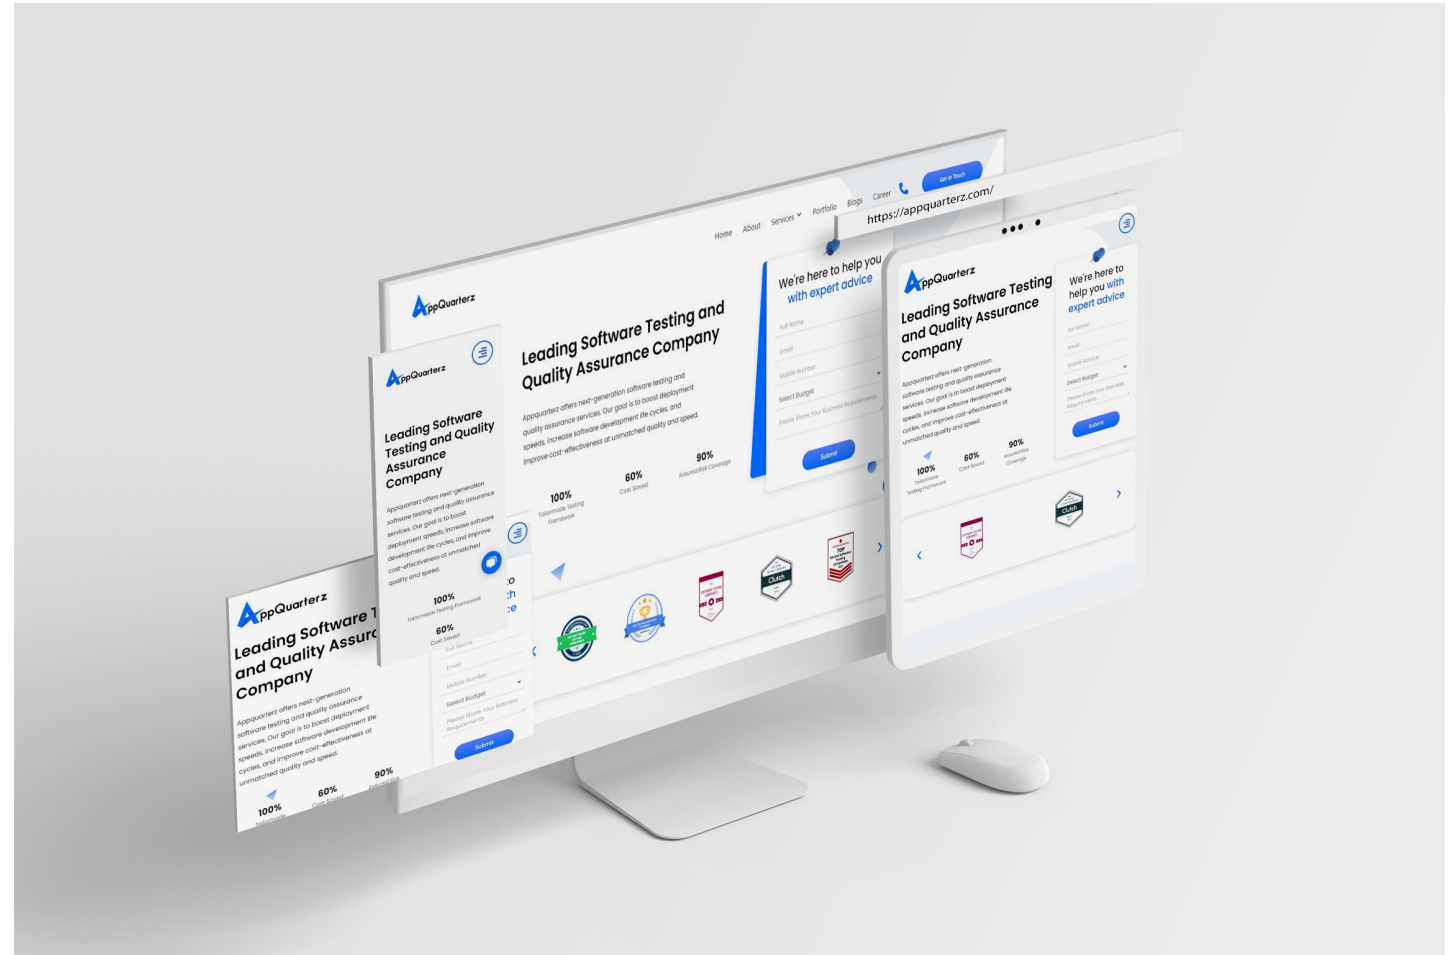

appquarterm.com

APPQUARTEZ

To enhance their online presence, AppQuarterz, a top software testing company in India, turned to GuruDesk for assistance. As GuruDesk, we transformed their mobile app into a website and created a custom analytics tool to regularly evaluate the user experience.

The system was also designed with a user-friendly admin panel, allowing the customer to easily make any necessary changes to the website.

objeplastik.com/en/

OBJE PLASTİK

Obje Plastik is a well-respected plastic industry wholesaler in Türkiye that was established in 2006. They approached GuruDesk to create a custom website for product promotion, but with the e-commerce feature disabled until they were ready to fully implement it.

The website was also developed to help with inventory management, giving the customer control over all related processes.

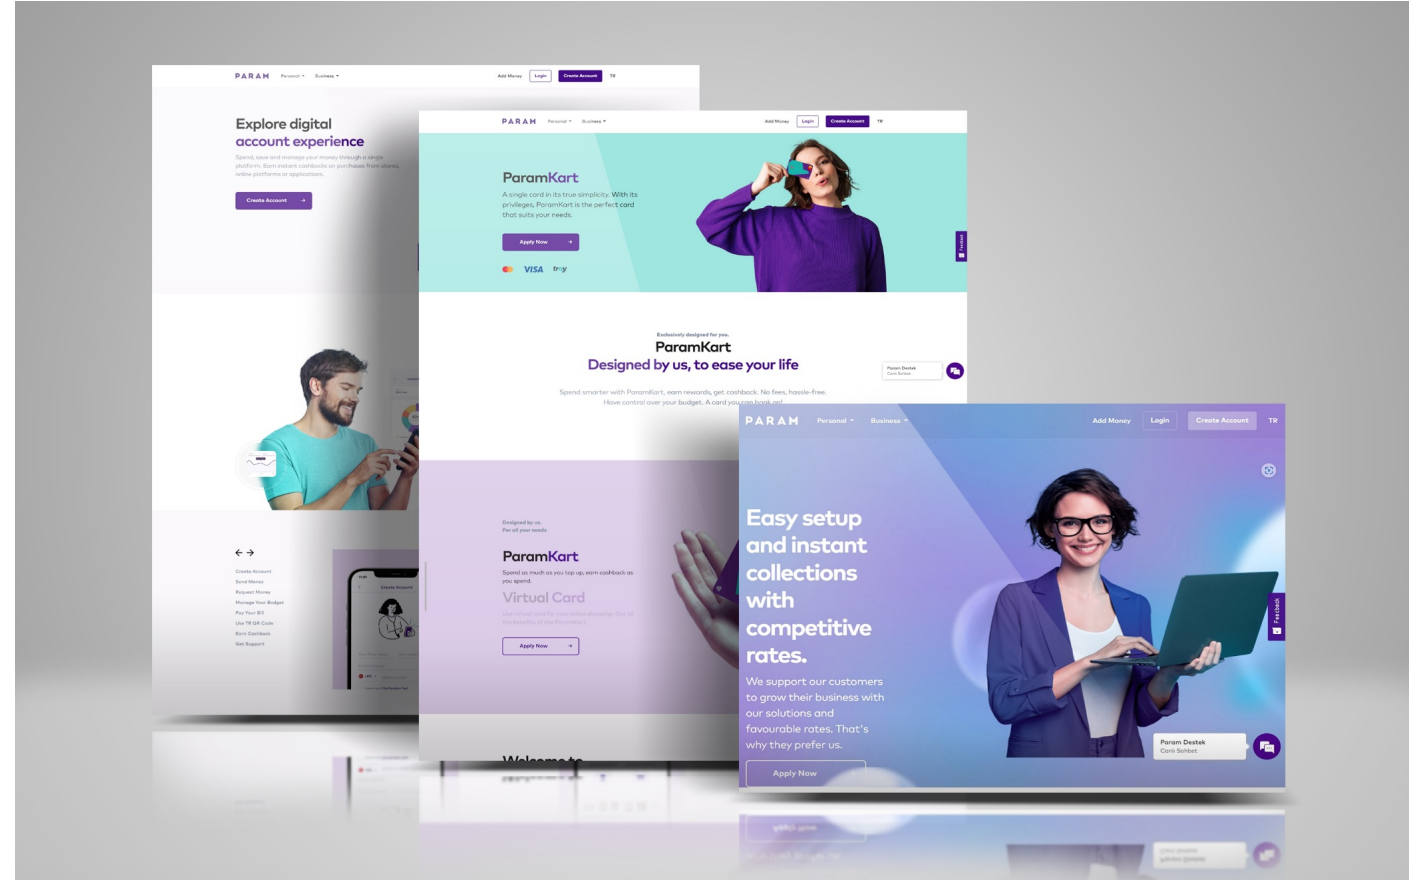

<http://param.com.tr/en/>

PARAM

Param is a FinTech company that is the first electronic money institution in Türkiye, founded in 2014. GuruDesk created a custom design for the company that aligns with their preferences, and the website was built from scratch with custom code rather than using a website builder.

Our experts at GuruDesk, who specialize in WordPress, also developed a custom Content Management System that allows the customer to manage everything as the administrator.

tec.biz

TEC

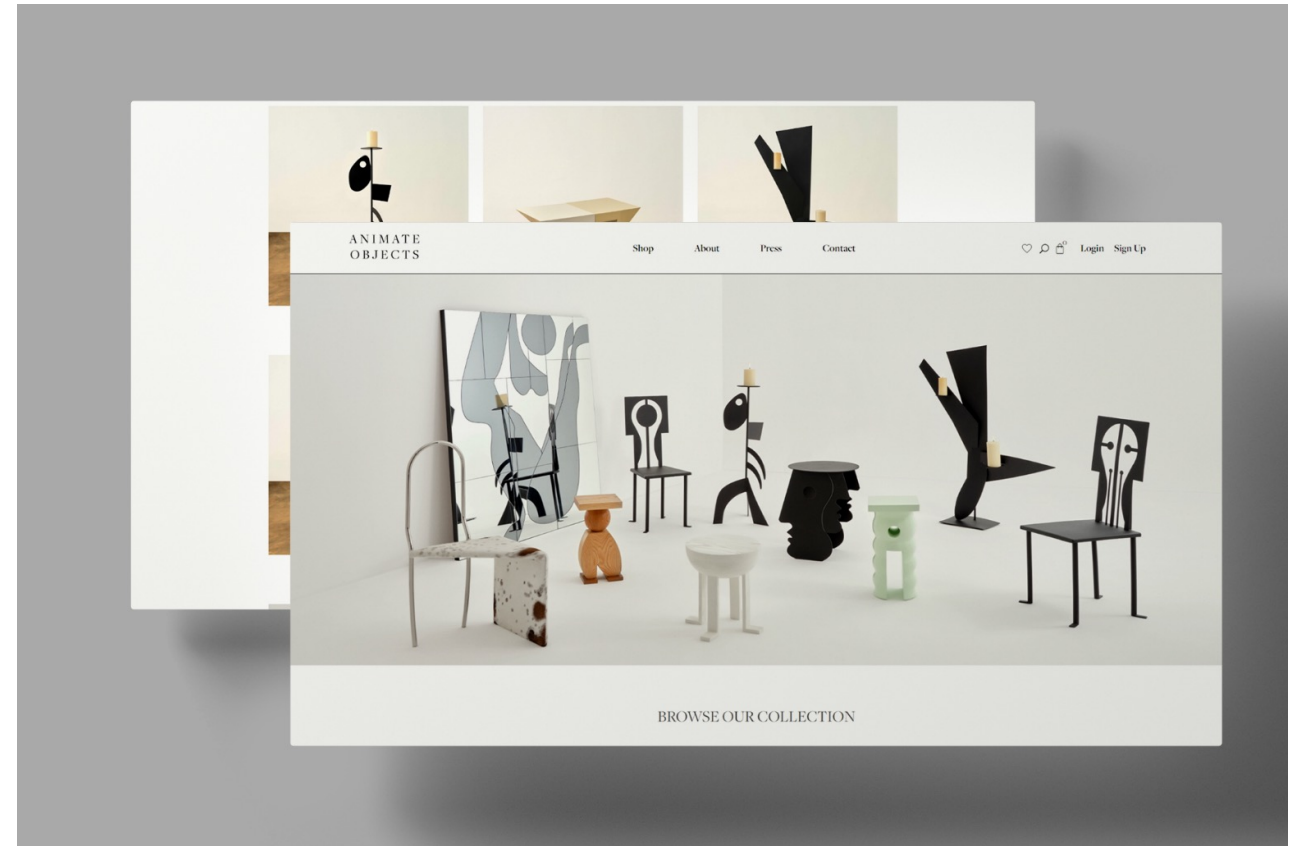

TEC Group is a highly experienced recruitment agency with a wealth of expertise in various specialist fields and a vast database of selected employees and employers. GuruDesk created an exceptional website for the company that meets all of their needs.

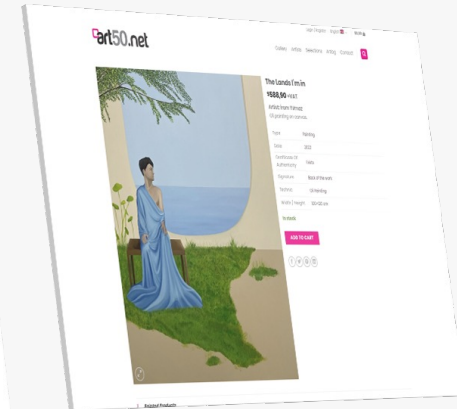

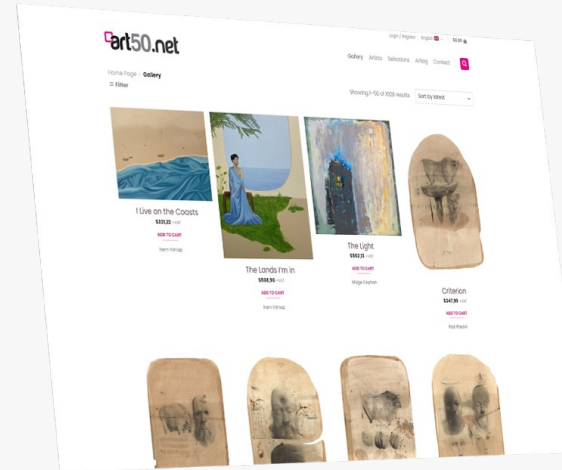

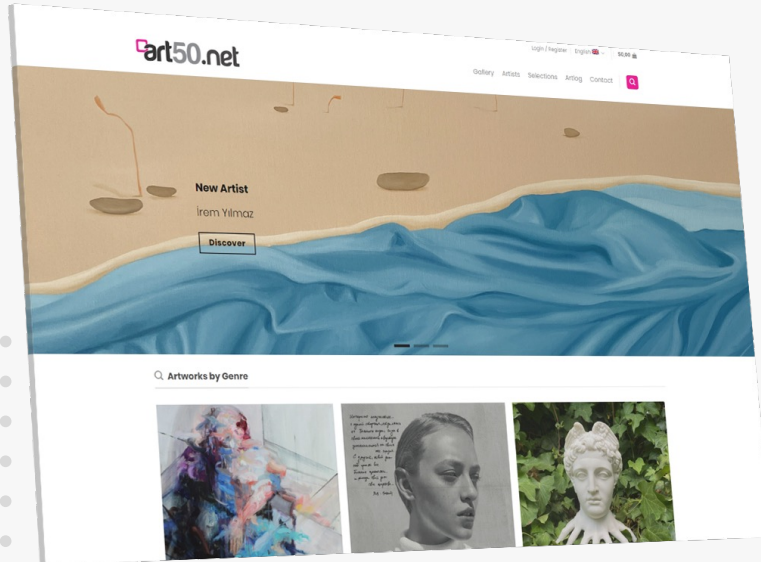

Although the structure of the website was challenging to build on a WordPress platform, our skilled experts were able to overcome any obstacles and complete the design. It's also worth noting that the website has an outstanding design that was customized to the customer's preferences.

animateobjects.co

ANIMATE OBJECTS

Animate Objects is a top furniture manufacturer in Türkiye. While the website follows a standard ecommerce platform, several custom features were added to meet the customer's specific requirements. For example, a unique design was created to handle the purchase and sale process based on the visitor's shopping preferences, without relying on any third-party tools. The website also has the ability to display different user interfaces in various countries.

art50.net/en

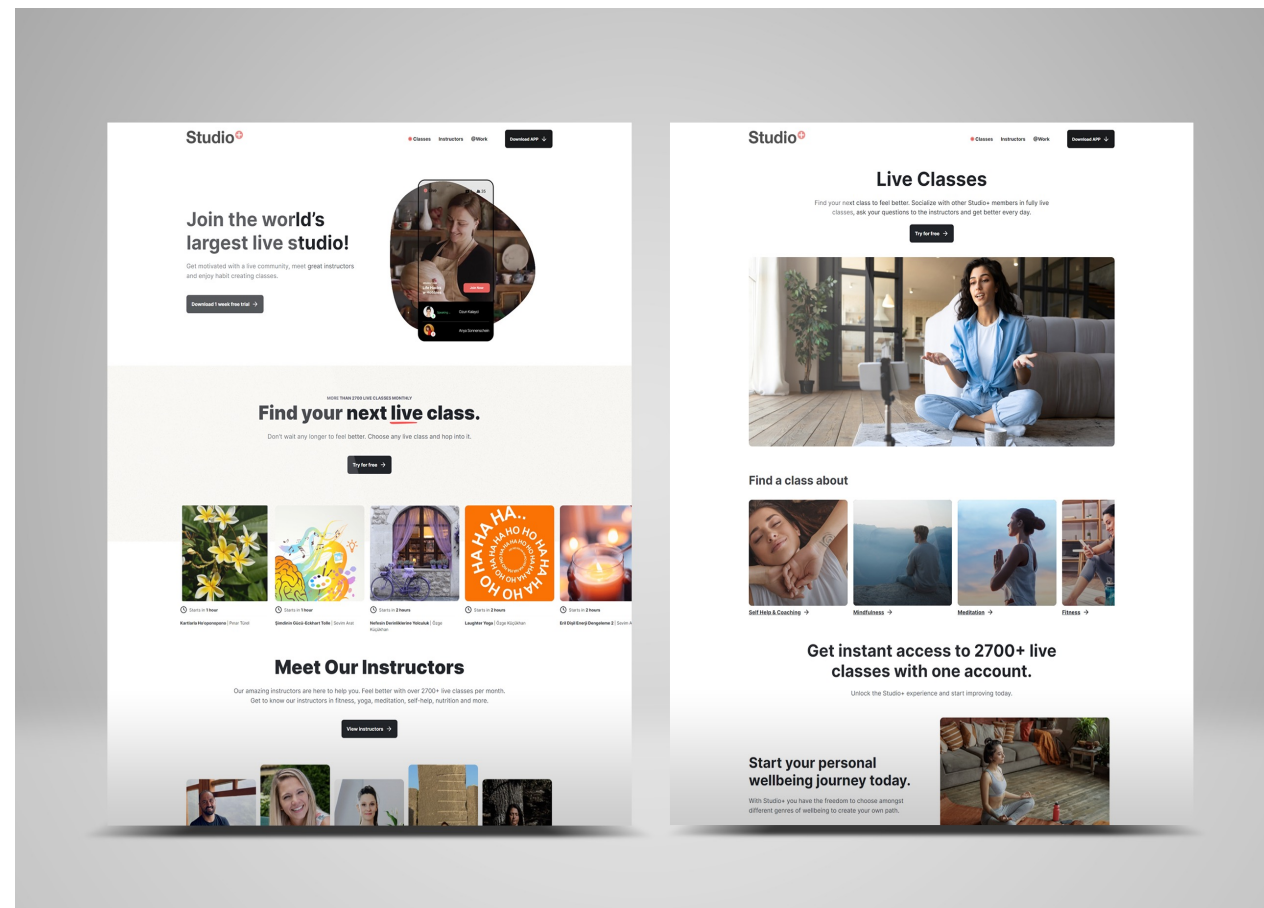

ART50

Art50 is a platform that connects artists and art enthusiasts. It allows artists to upload their work for review by the admin. The platform has a dynamic structure that makes it easy for the admin to manage the process. This feature is not available with WooCommerce extensions, so GuruDesk custom coded it to meet the customer's requests. In addition, an advanced filtering system was implemented to improve the user experience.

getstudioplus.com

GET STUDIO PLUS

Get Studio Plus is a platform that offers well-being courses that visitors can sign up for. The backend database for the courses updates automatically every hour, without requiring any intervention from an admin. The website has a fully customized design and code, and the customer can easily manage the content from a specifically designed admin panel that meets their specific needs.

artofyellow.com

ART OF YELLOW

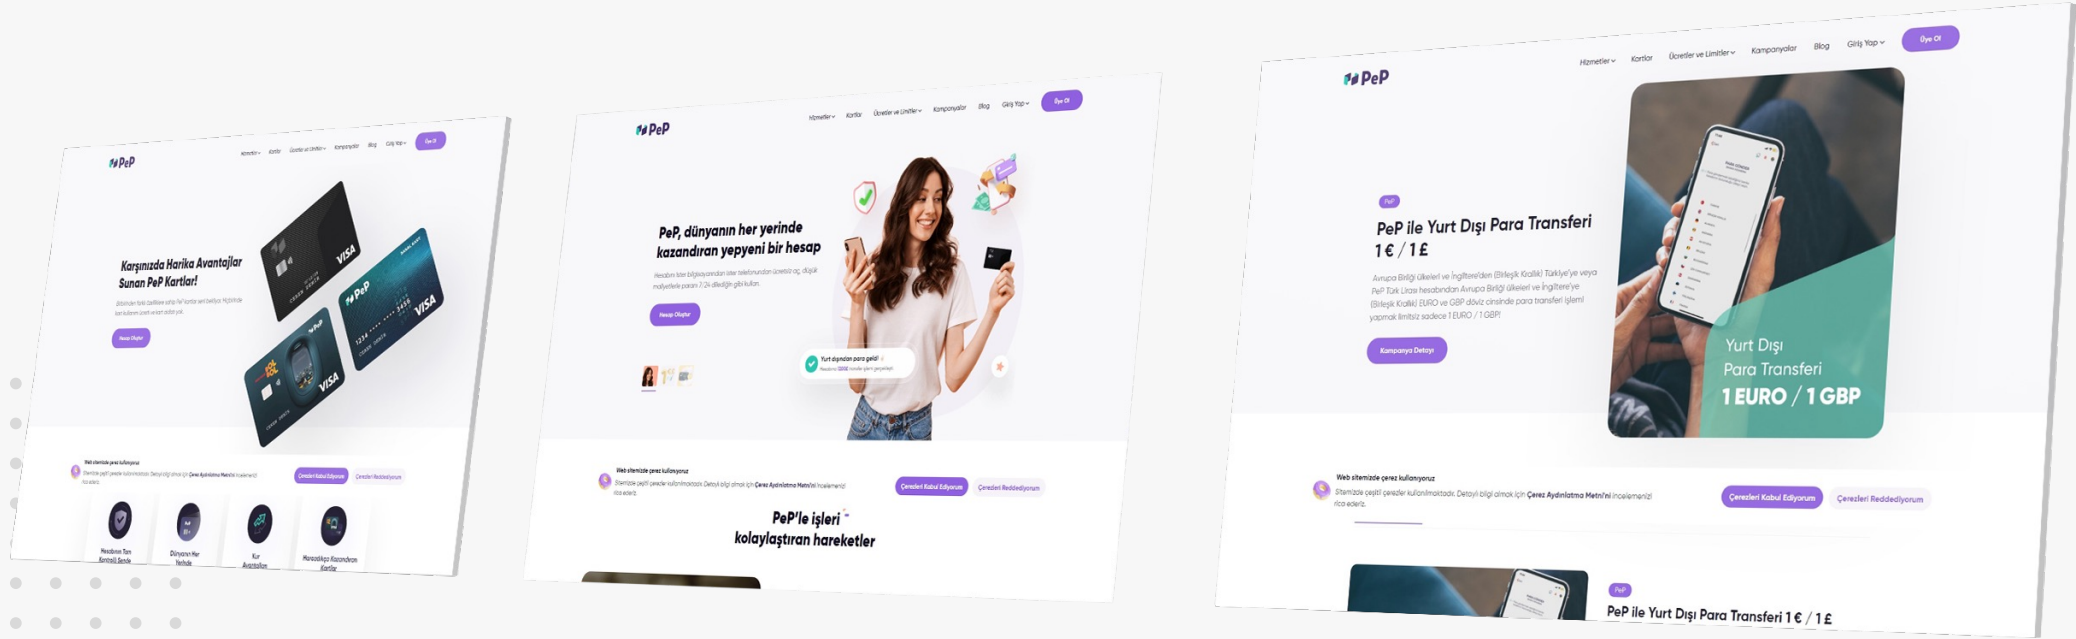

Art of Yellow is an ecommerce website that was designed to handle high traffic and maintain a high level of availability. The custom coding within the product details section allows the company to create personalized products for each customer. The website is also able to handle more than a thousand actions at the same time and received a positive score from a load test.

funxadds.nl

FUNX

A leading media entertainment company in Türkiye approached GuruDesk to create a custom website that meets their specific needs. The design was developed using Elementor, as the customer requested a dynamic drag and drop system to manage the website. The coding was also done with Elementor to ensure a pixel-perfect result. GuruDesk also provided customized coding to meet the customer's requirements and developed a system that allows visitors to listen to music on the website through the radio feature.

people.com.tr

PEPLE

GuruDesk created a unique website design that matches the preferences of the company and used custom code instead of a website builder to build the website from scratch. Our WordPress experts also developed a custom Content Management System that gives the customer full control over the website as the administrator. This boosts the performance of the website, while eliminating all security concerns, unlike most well-known website builders.
